PROJECTS

Happy Hour — *Happy hour and drink special finder*

- Created a single page website using React.js
- Utilized Material UI library to style the website
- Implemented GraphQL queries to connect to the back end database

Repository link: <https://github.com/MaestroLuu/Happy-Hour>

Live app: <https://project-happy-hour.herokuapp.com/>

Help for Hire — *Local chore and small task hiring app*

- Implemented front end mySQL/sequelize queries to database
- Adapted handlebars to optimize MVC performance
- Connected front end to Node/Express back end structure

Repository link: <https://github.com/chrismuto/Help-for-Hire>

Live app: <https://protected-taiga-32909.herokuapp.com/jobseeking>

PWA Text Editor — *Downloadable text editor*

- Implemented workbox package for PWA functionality
- Used Babel to create backwards compatible code
- Synchronized online and offline use with IndexedDB

Repository link: <https://github.com/chrismuto/Just-another-text-editor>

Live app: <https://fast-harbor-57378.herokuapp.com/>
